Meenakshi Singh, MD
Professor and Vice Chair, Anatomic Pathology, Department of Pathology, Stony Brook University Medical Center

**Triple Negative Breast Cancer**

**Needs:** Triple Negative Breast Cancer (TNBC) poses a challenge for management and new information on this is being published rapidly. This course will review new and emerging information on TNBC.

**Objectives:** To introduce the clinical profile of TNBC; to understand the therapeutic challenge posed by TNBC and describe the various options available and being developed; and to learn how the molecular and pathologic profile of these tumors can provide insights into possible targets for therapy.
