March 8, 2011

**Tara Sanft, MD**
Assistant Professor of Medical Oncology; Director of the CT Challenge Survivorship Clinic at Yale Cancer Center

**Gerard Sanacora, MD, PhD**
Professor of Psychiatry and Director of the Yale Depression Research Program

**Cancer Survivorship: Past, Present, and Future**

**Needs:** There are many gaps in care in the transition from cancer patient to survivor. This presentation will focus on the scope of the problem and potential solutions.

**Objectives:** To understand issues common to cancer survivors; to identify possible interventions that may improve outcomes; and to appreciate models of care, including the survivorship clinic and survivorship care plans.

**Psychology and Oncology: Shared Pathophysiological Targets of Interest?**

**Needs:** Recently emerging evidence suggesting that alterations in pathways regulating several aspects of neural plasticity may contribute to pathogenesis and treatment of mood and anxiety disorders raises interesting and unexpected connections to oncology.

**Objectives:** To review current hypotheses regarding the pathophysiology and treatment of mood and anxiety disorders and to outline molecular targets common to neuroscience and oncology.
